Cartagena/Colombia | La Maria carrera 30 #48-33

Full-Stack Developer with over 2 years of experience building scalable and optimized applications. Specialist in Laravel, Node.js, Vue.js, React, and Next.js, with strong expertise in UI/UX, RESTful APIs, and databases (MySQL, MongoDB). Passionate about innovation, teamwork under Agile methodologies (Scrum), and delivering high-impact solutions.

PROFESSIONAL EXPERIENCE

GETS, CARTAGENA

Frontend Developer

Cartagena, Colombia

November 2025 – March 2026

Project: Qualityfront (Enterprise Document Management Platform)

- Developed a scalable frontend using Vue 3, TypeScript, Vite, and Tailwind CSS, implementing a modular component architecture to improve maintainability and code reuse.
- Built backend content management workflows using Strapi (Headless CMS) with PostgreSQL, designing dynamic content models and business logic.
- Implemented secure and scalable document storage using AWS S3, ensuring high availability and data protection
- Collaborated in full-stack development, contributing to architecture decisions, API integration, and performance improvements.

Freelance | Softsyssolutions [gestor-documental](#)

FullStack Developer

Ecuador

December 2024 – July 2025

Project: Document Management System (Document Management Application)

- **Developed the frontend** of the Document Management System using **Vue 3, TypeScript, Vite, and Tailwind CSS**, implementing a modular architecture with reusable components to optimize scalability and maintainability.
- **Integrated Strapi as a headless CMS** with a **PostgreSQL** database, configuring the logic for content management and dynamic models.
- Implemented file storage in **AWS S3** to ensure security, scalability, and high availability.
- Optimized document search by integrating **Elasticsearch** and **WebSockets**, improving query speed and accuracy.
- Designed authentication flows with **JWT** and role-based access control, ensuring a robust and secure system.
- Implemented **end-to-end** testing with **Cypress** to guarantee product quality and stability.

GETS, CARTAGENA

Backend Developer

Cartagena, Colombia

May 2024 – July 2024

- **Developed microservices** in **Node.js**, integrating **Azure Cosmos DB** and Service Bus for automated transaction management and property integration from multiple MLSs.
- Implemented a **messaging-based architecture** using **queues** and **topics** in **AWS** to ensure efficient communication, scalability, and decoupling between microservices.

GETS, CARTAGENA

FullStack Developer

Cartagena, Colombia

August 2024 – January 2024

- Developed an API with **Laravel** for sales management and company administration.
- Built modular and dynamic applications using **React, Next.js**, and **PHP/Livewire** to enhance user interaction with the Laravel-based API.
- Integrated APIs using **Next.js** to optimize data flow and performance.
- Designed responsive web interfaces with **Figma** and **Tailwind CSS**.
- Developed customizable websites with **WordPress** for efficient content management.
